A globally innovative blended learning system for kids

Happy kids & happy teens!

Our globally innovative blended learning programmes and curriculum are specifically designed for children who start learning English at a very early age (from 6 years old) and young learners.

Our very young and young learners go through a complete blended learning experience and learn English while having fun.

One global standard

All AXON courses are aligned to the Common European Framework of Reference for Languages (CEFR), which is the most widely used and recognized language proficiency scale in the world.

Language instruction benefits kids and teens

- It encourages intellectual development
- It aids understanding of the native language
- It lays a foundation for appreciating other cultures
- It provides a sound basis for language learning at school

AXON supports your child's success

AXON offers several options for a child to learn English. All are taught by **highly trained, native or fluent speakers** who are experienced with and enjoy teaching children. Programmes group children of similar ages, who learn while playing and participating in other activities.

Small groups of 2-9 Students

Groups consist of students of same level focusing on **personalized teaching**.

Qualified teachers

All academic personnel are trained by the **AXON Teacher training centre**, through webinars and teleconference and are guided into using the most up to date pedagogical methods.

Constant research and improvement

There is constant monitoring and continuous updating of our programme to incorporate all the developments in the Pedagogical field and in particular in Teaching English as a Foreign Language.

Advanced Pedagogical Methods

Our courses include use of multimedia, interactive material, video viewing & videotaping sessions and continuous assessment combined with our supplementary educational material and e-learning programme.

ENGLISH: The Modern English!

Where learning meets fun! 'English' is an AXON innovation designed specifically for our very young and young learners as a supplementary educational tool. It is an experiential way to learn English with the use of authentic material (film extracts, songs, sportscasting, etc) in order to improve communicative skills and also to entertain.

Axon@Home

The professional assistant in English! **Axon@home** is another AXON innovation. It's an electronic device synchronized with our books that helps learners to have a unique learning experience at their home where they can review and consolidate material they were taught at their own pace.

"Education is not preparation for life; education is life itself".

John Dewey
